<b>16:00-17:00</b>	<b>Plenary</b>	<p><b>Professor Simon Teasdale, Glasgow Caledonian University</b></p> <p><b><i>Reaching the promised land: Social innovation as utopia</i></b></p> <p>Social innovation involves collaboration between a wide range of actors aimed at achieving social change. However, the nature of such social change is subject to considerable debate and, it is rare for social innovation actors to clearly articulate a shared vision. This exploratory presentation seeks to re-politicise the concept of social innovation through returning social change to the foreground. Theoretically grounded within Olin Wright's work on utopia, the presentation draws upon content analysis, and critical discourse analysis, of publicly available texts produced by two key social innovation intermediaries in order to ascertain the problems they seek to address; the utopian visions they strive for; and the 'strategic logics of transformation' employed to achieve reach these promised lands.</p>
<b>19:00-20:30</b>	<b>Civic Reception</b>	Glasgow City Chambers

## Tuesday 3<sup>rd</sup> September

9:00-9:30	Refreshments	Ground floor
9:30-10:30	Plenary	<p><b>Professor Stephen Osborne, University of Edinburgh</b></p> <p><b><i>Public service innovation: a value co-creation framework</i></b>            Professor Stephen Osborne's research focuses on four areas: the role of the third sector in delivering public services, co-production, innovation in public services and public services reform, and latterly the development of the theories of the New Public Governance and a Public Service-Dominant Logic for Public Service Organisations. This latter work has shifted public management theory and practice away from a manufacturing and Product-Dominant business logic and towards one that recognises the special challenges of services management for public services.</p>
10:30-11:00	Refreshment Break	Ground floor, 2nd floor, 5th floor (dietary requirements on ground floor)
11:00-12:30	Parallel sessions	Room details listed, see full programme

15:30-16:00	Refreshment Break	Ground floor, 2nd floor, 5th floor (dietary requirements on ground floor)
16:00-17:00	Plenary	<p><b>Professor Jürgen Howaldt, Dortmund University</b></p> <p><b><i>Global Challenges and a Comprehensive Innovation Policy – A Systemic Perspective on Social Innovation</i></b>            The importance of social innovation in successfully addressing social, economic, political and environmental challenges of the 21st century is recognised not only within the Europe 2020 strategy, but also on a global scale. Social innovations, just like technological innovations require appropriate infrastructures and resources in order to flourish and create impact. Moreover, social innovations require specific conditions as they aim at activating, fostering and utilizing the innovation potential of the whole society. Although, there is an increasing awareness and promotion of social innovation, at the same time, in most countries social innovation is not considered a key component of innovation policy. Hence, initiatives and their sustainability are highly dependent on individual actors, groups and networks. Against this background, the presentation will outline the challenges for a comprehensive innovation policy.</p>
19:00- late	Conference Dinner	Radisson Blu Hotel, Glasgow City Centre

## Wednesday 4<sup>th</sup> September

9:00-9:30	Refreshments	Ground floor
9:30-10:30	Plenary	<p><b>Dr Helen Haugh, University of Cambridge</b></p> <p><b><i>Social entrepreneurship and the common good?</i></b>            The common good refers to contextual conditions that advance human well-being and flourishing. In this talk I will examine how social enterprise hybrid strategies contribute to the common good. Using illustrative examples from sustainable social enterprises, I explain how social enterprise hybrid strategies have been designed to enhance economic, social and environmental sustainability in the present and in the future and label such strategies common good giving and common good staking. Further, that strategies may diminish economic, social and environmental sustainability, a phenomenon labelled common good taking. I will suggest some research opportunities that have the potential to advance common good theory and practice.</p>
10:30-11:00	Refreshment Break	Ground floor, 2nd floor, 5th floor (dietary requirements on ground floor)

16:00-17:00	Plenary	<p><b>Professor Eleanor Shaw, University of Strathclyde</b></p> <p><b><i>Social Innovation - what do we know now and where are going?</i></b>            This very final keynote speech will provide concluding observations deriving from ISIRC 2019. The presentation will help to unpack some of the following questions: What have we learnt and what do we know now? Also, what is the future of social innovation research, policy and practice? As such, the speech will assist in reflecting on ISIRC 2019 and its theme: Social Innovation: Local Solutions to Global Challenges.</p>
